

# Trane Announces Significant Centrifugal Chiller Line Expansion and Services for Hong Kong

*Trane HFO Chiller is Now Available in Hong Kong*

**Hong Kong, 14 December 2016** – Trane, a leading global provider of indoor comfort solutions and services and a brand of Ingersoll Rand, is expanding its CenTraVac™ centrifugal chiller portfolio for large buildings and industrial applications in Hong Kong. These additions address customer demand for chillers and services that are efficient, reliable, safe and compliant with current and proposed regulations.

Starting now, Trane will offer large tonnage CenTraVac chillers for applications such as large commercial complexes, hospitals, major infrastructures, district cooling plants, data centers and higher education facilities with R-1233zd (Honeywell Solstice® zd). R-1233zd is a next-generation, low global warming potential (GWP), non-flammable (A1) refrigerant from Honeywell (Solstice® zd).

Trane CenTraVac chillers are the most reliable, efficient, lowest emission and quietest centrifugal chillers on the market today. They are part of the Ingersoll Rand EcoWise™ portfolio of products that are designed to lower environmental impact with next-generation, low-GWP refrigerants and high efficiency operation.

“We are pleased to bring our customers new choices for achieving their building, business and sustainability goals without compromising safety, performance or efficiency,” said Frankie Chan, Managing director – Systems and Services of Trane Hong Kong. “We paired our technical and applications expertise with new refrigerant and service offerings to deliver efficiency and reliability that customer expect.”

## Ingersoll Rand Climate Commitment

Ingersoll Rand, a world leader in creating comfortable, sustainable and efficient environments, made a Climate Commitment to reduce GHG emissions from its products and operations by 2030. The Ingersoll Rand Climate Commitment pledges to:

Cut the refrigerant GHG footprint of its products by 50 percent by 2020 and incorporate lower GWP alternatives across its portfolio by 2030;

Invest \$500 million in product-related research and development by 2020 to fund the long-term reduction of GHG emissions; and

Reduce company operations-related GHG emissions by 35 percent by 2020.

To date, the **Climate Commitment** has supported the avoidance of approximately 2 million metric tons of CO<sub>2</sub>e globally, which is the equivalent of avoiding annual CO<sub>2</sub> emissions from energy used in more than 270,000 homes or more than 2.1 billion pounds of coal burned. By 2030, the company expects to reduce its carbon footprint by 50 million metric tons. To learn more, visit [www.trane.com/ecowise](http://www.trane.com/ecowise).
